collaboration

Drive Business
with Smarter
Collaboration

Smarter collaboration is your answer to accessing the right people, deliver and receive the right information across multiple channels (mobile, desktop, kiosk or web).

We package different products into a solution tailored to address your unique business needs

BusinessIT Collaboration Services & Technology

1. Portal Experience

IBM WebSphere Portal products give users a single point of access to the applications, services, information and social connections they need. These products help increase visitor response and reduce web operations cost while offering a range of capabilities to meet your business needs.

2. Social Collaboration

IBM® Connections is a leading social software platform that can help your organization engage the right people, accelerate innovation and deliver results. This integrated, security-rich platform helps people engage with networks of experts in the context of critical business processes.

3. Enterprise Content Management

Document management with IBM® FileNet® Content Manager helps you meet the growing challenge of managing enterprise content with greater speed, efficiency and accuracy. FileNet Content Manager is a document management engine that combines enterprise content, security and storage features with ready-to-use workflow and process management capabilities.

4. Mobile Access

IBM® Notes® Traveler is a push email software that provides quick access to email, calendar and contacts from a wide range of mobile devices or tablets.

Every organization needs to see and control the mobile devices entering their enterprise, whether they are provided by the company or part of a Bring Your Own Device (BYOD) program. MaaS360 Mobile Device Management (MDM) is the fastest, most comprehensive way to make that happen.

5. Rich Client Access

IBM® Notes® is a desktop client for social business. This email software includes messaging, applications and social collaboration. IBM Notes features clean, modern social user interface that provides activity streams, microblogging and social file sharing, directly from your Inbox.

6. Unified Communications

IBM® Sametime® products integrate real-time social communications into your business environment, providing a unified user experience through instant messaging, online meetings, voice, video and data.

7. Core platform

IBM® Domino® is an advanced platform for hosting social business applications. It delivers scalable, security-rich applications at a low cost, helping you improve productivity, accelerate operations and enhance decision-making.

8. Application Server

IBM® WebSphere® Application Server offers options for a faster, more flexible Java application server runtime environment with enhanced reliability and resiliency for building and running applications, including cloud and mobile. It supports environments from single server and medium-sized configurations to large deployments requiring web tier clustering over multiple application server instances.

9. Enterprise Database

DB2 database software offers industry leading performance, scale, and reliability on your choice of platform from Linux, UNIX and Windows to z/OS.

10. Infrastructure Layer/Operating Environment

Supports Windows, Linux, AIX, Solaris and zLinux Operating Systems with an option for On-premise, Cloud, Hybrid and Virtualized Infrastructure
